Project Description

According to the IADB, this Technical Cooperation (TC) aims to sustainably booster borrowing member countries in enhancing their public procurement and financial management systems. The overarching goal is to empower national institutions, augment service delivery, and enhance policy implementation. This is achieved through two key approaches: 1) Facilitating the adoption and integration of international standards or narrowing the gaps with best practices; 2) Fostering knowledge transfer and facilitating government-to-government collaboration within the region. This exchange mechanism enables the sharing of successful practices and insights gleaned from experiences in other countries.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
