Investment Amount (USD)\$ 0.10 million	
Project Cost (USD)	\$ 0.10 million

Enhancing Impact through the Client Portal: Evaluation of the Digital Semiannual Report on Client

Project Description

According to the IADB, the general objective of this TC is to enhance our understanding of Project Executing Units (PEUs), addressing gaps in knowledge about their internal processes, management practices, and incentives. The specific objectives are: (i) to evaluate the impact of gaining access to digitally generate the project's comprehensive semi-annual report on short-term project performance and PEUs' perception of IDB support, and (ii) to measure whether PEUs are actively incorporating high-quality lessons learned during and after project execution, providing an estimate of their responsiveness to unforeseen obstacles. To the best of our knowledge, this is the first study to evaluate the impact of simplifying the communication between a PEU and its main stakeholder over project performance.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
