Financial Institutions	Inter-American Development Bank (IADB)
Status	Active
Bank Risk Rating	U
Voting Date	2024-12-05
Borrower	IDB borrowing countries
Sectors	Finance, Technical Cooperation
Investment Type(s)	Advisory Services
Investment Amount (USD)	\$ 0.34 million
Project Cost (USD)	\$ 0.34 million

## Project Description

According to the IADB, the main objective of this Technical Cooperation project is to strengthen the evaluation capacities of beneficiary agencies' productive programs using administrative data. The specific objectives are to: (i) Facilitate the design and implementation of impact evaluations of two productive development public programs in Chile. It is expected that one of these programs had been advanced by Servicio de Cooperacion Tecnica (SERCOTEC) and the other one by Corporacion de Fomento (CORFO).

The evaluations will incorporate merged data from these programs and the administrative records from Chile's national tax authority, Servicio de Impuestos Internos (SII). (ii) Facilitate the design and implementation of impact evaluations of at least two productive development public programs in Peru. It is expected that one of these programs had been advanced by Pro Innovate and the other one by Consejo Nacional de Ciencia, Tecnologia e Innovacion (CONCYTEC). The evaluations will utilize combined data from these programs and the administrative records of payroll, firms' performance, trade, and debt collected by various Peruvian regulatory agencies. (iii) Support the establishment of a permanent interagency cooperation agreement between Peru's Ministry of Economy and Finance and public agencies involved in productive development programs, as previously mentioned, to facilitate the sharing of administrative records concerning payroll, firms' performance, trade, and debt. (iv) Build capacities within the agencies participating in the impact evaluations referred in paragraphs (i) and (ii), for them to exploit shared administrative records for the permanent evaluation of some of their productive development programs.

## ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
