Project Description

According to the IADB, the objective of this TC is to generate rigorous regional evidence on the effectiveness of digital interventions for the detection, prevention and treatment of NCDs in LAC. The specific objectives include: 1) evaluate whether digital tools for risk estimation and population management could increase the uptake and optimize the use of screening services for NCDs; (2) generate evidence on whether digital interventions for patients can help them reduce risk factors and early onset of NCDs; and (3) assess the quality and cost of telehealth visits for patients with NCDs. The TC will conduct three separate evaluations to achieve these specific objectives. The beneficiary of this project will be Belize, El Salvador, Brazil among others to be determined; Indirect: other countries that use the knowledge products

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
