Project Description

According to the IADB, the objective of the TC is to strengthen the resilience of borrowing member countries in Latin America and the Caribbean to external shocks as well as to increase their contribution to regional and global public goods. This will be achieved by reformulating the current eligibility for concessional resources using vulnerability-anchored criteria and by designing a system of incentives to help countries prioritize projects that contribute to regional and public goods.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
