IADB-RG-T4647

Integration of sorghum cultivation in the productive systems of the Central American Dry Corridor

Project Description

According to the IADB, the objective of the technical cooperation is to sustainably intensify the agricultural systems of the Dry Corridor of Central America by incorporating sorghum genotypes and other forage cereals adapted to each environment in order to increase the productivity, sustainability, and resilience of the production systems.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
