Project Description

According to the IADB, the objective of this Technical Cooperation (TC) is to enhance the technical capacities of financial cooperatives, enabling them to expand financing for bioeconomy projects and activities in the Amazon region. Additionally, it aims to strengthen their connection with public financial institutions--key capital providers--by fostering knowledge exchange and implementing financial tools and innovations that would increase capital raising and deployment in the region. By leveraging the extensive reach of financial cooperatives in remote regions, this initiative will facilitate greater financial inclusion and ensure that resources effectively reach bioeconomy related activities and bio-businesses deep within the Amazon territories.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
