Project Description

According to the IADB, the objective of the project is to enhance project execution of projects in the areas of social protection and employment. Specific objectives: (i) enhance the monitoring, execution feasibility, and adaptive management of SPL projects by developing standardized management tools that integrate both qualitative and quantitative approaches. These tools will strengthen decision-making processes, link outputs to outcomes, and improve operational tracking mechanisms to ensure a focus on achieving results through effective implementation strategies; (ii) strengthen the skills of project teams and executing agencies to monitor and execute projects.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
