## **Project Description**

According to the IADB, the General Objective of this Technical Cooperation (TC) is to develop predictive and causal inference models to understand and enhance the effectiveness of IDB operations. The Specific Objectives are: i) to build a predictive system capable of dynamically identifying operations with a low likelihood of effectiveness at closure, as measured by PCRs and OVE validations, and ii) to evaluate the causal impact of key instruments from the Development Effectiveness Framework (DEF)--mainly, the Development Effectiveness Matrix (DEM) and the Progress Monitoring Report (PMR)--on project performance.

## ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
