## **Project Description**

According to the IADB, the general objective of this Technical Cooperation (TC) is to support beneficiary countries in strengthening regional digital integration through cooperation and joint decision-making among regional stakeholders. To this end, the proposal focuses on: (i) developing a regional roadmap to 2030 that guides joint investments in digital infrastructure and promotes technical and regulatory coordination among beneficiary countries; (ii) identifying and designing solutions to overcome barriers that limit the expansion of connectivity and interoperability, strengthening the resilience of regional networks; and (iii) analyzing, defining, and implementing strategies for integrating harmonized regulatory frameworks that foster equitable access to high-quality digital services, the development of digital capacities, and cooperation among governments, the private sector, and civil society.

### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
