Investment Type(s)	Advisory Services
Investment Amount (USD)	\$ 0.98 million
Project Cost (USD)	\$ 0.98 million

Project Description

As stated by the IADB, the objective of this technical cooperation project is to advance the regional energy integration agenda in Central America through SIEPAC and in the Andean region through SINEA. The specific objectives are:

- (i) to support the expansion of Central America's regional electricity grid;
- (ii) to advance the design of the Andean regional electricity infrastructure and the development of its short-term Andean market; and
- (iii) to promote regional energy planning through the analysis of new generation technologies.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
