Project Description

According to the IADB, the main objective of this Technical Cooperation initiative is to strengthen regulatory governance in Latin America and the Caribbean by supporting governments in the region in implementing best practices and management tools, particularly the use of Artificial Intelligence (AI). The Technical Cooperation initiative will leverage Artificial Intelligence (AI) as an enabling tool to improve evidence-based regulatory processes. The specific objectives are: (i) to identify critical gaps in regulatory governance that affect quality, efficiency, and evidence-based decision-making in participating countries; (ii) to design, adapt, and support the implementation of pilot interventions that operationalize improvements in selected regulatory functions, including regulatory simplification, AI-supported regulatory impact analysis, public consultation analytics, and risk-based regulatory oversight; and (iii) to develop tools, knowledge products, and regional dialogue forums to disseminate lessons learned and promote the structured adoption of modern regulatory improvement practices.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
