Project Description

According to the IADB, this TC seeks to accelerate the ability of cities to identify, test, and integrate innovative solutions into their urban development practices. Its core objective is to strengthen climate resiliency and social inclusion in LAC cities through place-based prototyping and technology-assisted planning. The TC will: (i) build a robust knowledge base to support the institutionalization of urban innovation and data-driven planning practices; (ii) co-design, test, and evaluate prototypes addressing key resilience challenges, such as public space quality, housing conditions, and the integration of natural ecosystems into the built environment; and (iii) strengthen knowledge transfer and capacity building - particularly digital innovation and Smart City oriented planning - so local governments and practitioners can adopt and scale effective practices.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
