Project Description

According to the IADB, the general objective of this Technical Cooperation (TC) is to enhance the effectiveness of the operations of the State Institutional Capacity Division (ICS) through the deployment of an Artificial Intelligence (AI) agent platform (LILU) that provides support throughout the entire project cycle. The specific objectives are to: (i) expand LILU's coverage to all stages of the project cycle, including project design, implementation, and closure; (ii) strengthen the support provided by the Development Effectiveness (DE) area of ICS to project teams by expanding LILU's application across the design, implementation, and closure stages of projects; and (iii) address knowledge gaps related to the use of AI in the design, implementation, and closure of ICS development projects.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
