Project Description

According to the IADB, the objective of this Technical Cooperation (TC) is to develop a methodology for estimating the causal effect of performance-based grant (PBG) programs to subnational governments that can be adapted to the particular context of each operation, so this type of operation can be rigorously evaluated. The specific objectives are: (i) to characterize the design of PBG programs, map the identification challenges it poses for evaluation, and develop a theoretical model of fiscal spillovers between subnational governments; and (ii) to assess the availability and comparability of subnational fiscal data in the region and, on that basis, produce an evaluation decision framework and toolkit that match evaluation methods to the data each operation has available.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
