IADB-SU-L1036

Support to the Institutional and Operational Strengthening of the Energy Sector

Project Description

The general objective of the program is to increase the efficiency, transparency, sustainability and accountability of the power sector. The specific objectives are: (i) to develop an institutional and regulatory framework; and (ii) to strengthen the corporate capabilities of the sector to supply electricity in an economic, efficient and sustainable manner. This operation is the third and final in a programmatic policy-based series of independently and technically connected loans, in accordance with the Guidelines for Preparation and Implementation for Policy-based Loans (document CS-3633-1). The operation will consolidate the support for the policy reforms and sector decisions envisioned in the program, including the approval of a sector policy with an accompanying legal and institutional framework, a revised electricity tariff that reflects price-setting principles and improvements in N.V. Energie Bedrijven Suriname (EBS)'s corporate capacity and governance.

ACCOUNTABILITY MECHANISM OF IDB/ IIC

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
