Project Description

The general objective of this project is to contribute to the improvement of agricultural productivity, climate resilience and ecological sustainability of the agricultural sector in Suriname. The specific objectives are to: (i) strengthen sustainable management of the Nanni Swamp watershed through improved biodiversity-positive irrigation and drainage systems for farmers in Nieuw Nickerie; (ii) increase readiness of farmers for extreme climate events by implementing a multi-hazard early warning system for floods, droughts and salinity intrusion in Nieuw Nickerie; (iii) promote the adoption of more productive, climate-smart technologies and practices by improving the quality and outreach of extension services, with the support of modernized agriculture information systems; and (iv) promote the strengthening of agricultural value chains through a pilot network of integrated, community-based AgriHubs as a coordination and innovative business model for the Ministry of Agriculture, Livestock and Fisheries.

ACCOUNTABILITY MECHANISM OF IDB / IDB INVEST

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IDB Invest)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IDB Invest is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
