Project Description

The objective of the third operation is to improve the quality of health service delivery by enhancing efficiency in accessing medical records by the various health system actors, through: (i) consolidating the National Electronic Health Records (HCEN) platform; (ii) facilitating greater production and sharing of medical data in digital format by healthcare providers; and (iii) increasing the use of medical records data in order to strengthen both the steering role of the health sector and the decision-making process at high management level in health service providers.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
