Project Description

The objective of this technical cooperation (TC) is the design and implementation of innovative training models for the development of knowledge and technical skills that support an economic recovery through the creation of successful learning and labor trajectories (training and employment) for the second green energy transition in Uruguay. Emphasis will be placed on improving the pertinence of Vocational Technical and Technological Education with an inclusive and bottom-up training in an innovative way by the way of teaching and learning, and techniques that from solutions that accompany the development of sustainable electric mobility serve for labor reconversion, and access and progress to the generation of new jobs.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici.1752.html (in English) or http://www.iadb.org/es/mici/mici.1752.html (Spanish).
