## Project Description

According to the IADB, the objective of the prototype is to incentivize the generation of solar energy, and thus reduce GHG emissions, through a mechanism that facilitates access to renewable energy certificates for small distributed solar photovoltaic generators in distributed solar photovoltaic power generators in Uruguay, including urban and rural households, MSMEs and institutions.

## Investment Description

- Inter-American Development Bank (IADB)

-

## ACCOUNTABILITY MECHANISM OF IDB / IDB INVEST

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IDB Invest)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IDB Invest is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
