Project Description

According to the IADB, the main objective of this Technical Cooperation (TC) is to strengthen OSE's institutional management to improve the sustainability, efficiency, and quality of drinking water and sanitation services in Uruguay. To achieve this, the TC will focus on two key areas: (i) Corporate and Operational Strengthening: enhancing the organization's management capacity, particularly in project design, monitoring, supervision, and evaluation; and (ii) Improvement of Non-Revenue Water (NRW) Management: addressing operational and commercial water losses. This Bank support aims to develop a clear action plan, engage key decision-makers, and implement immediate-impact measures with replication potential, leveraging improvement opportunities identified in previous operations.
