Project Cost (USD)	\$ 0.15 million

IADB-UR-T1353

Energy in Motion: From Clean Transportation to Recycled Batteries

Project Description

According to the IADB, the general objective of this technical cooperation is to support the country in its transition toward a cleaner energy matrix with greater use of domestic energy sources. The specific objectives are to contribute to the development of conditions for the efficient and sustainable use of storage batteries.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
