IADB-VE-T1091

Formulation and Implementation of a Geospatial Strategy for the Territorial Development of

Project Description

The objective of this Technical Cooperation (TC) is to contribute to the territorial development of Venezuela through the formulation and implementation of a geospatial data strategy. The implementation of this strategy will consist of: (i) collect geo-referenced data on urban infrastructure and land; (ii) formulate pilot land-use plans; (iii) create an online digital territorial information system for public authorities to consult and analyze the data collected; and (iv) develop at the conceptual level investment projects aimed at improving public services.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
