Parque Arauco Wind Projects

### Quick Facts

Countries	Argentina
Financial Institutions	IDB Invest (IDBI)
Status	Proposed
Bank Risk Rating	B
Borrower	Vientos de Arauco Renovables SAU y Arauco Renovables SAU
Sectors	Energy
Investment Type(s)	Loan
Investment Amount (USD)	\$ 50.00 million
Project Cost (USD)	\$ 50.00 million

---

## Project Description

The Inter-American Investment Corporation ("IIC") is considering the granting of a loan to support the construction of (a) Phases 1 and 2 of the Arauco II Wind Project, a wind farm of approximately 99.75 MW of installed capacity. part of Vientos de Arauco Renovables SAU - a specific purpose company -, (b) Phases 3 and 4 of the Arauco II Wind Project, a wind farm of approximately 95 MW of installed capacity by Arauco Renovables SAU - a specific purpose company ( both parks will be located in the same location as the current ones, Arauco I) and (c) a high voltage transmission line of 83 kilometers (132 kV) to connect the plants of the Arauco II Wind Project to the La Rioja distribution transformer station South that connects with the national network.

---

## People Affected By This Project

The Project has been preliminarily classified as Category B (Medium Risk) according to the IIC's Environmental and Social Sustainability Policy. The project categorization will be confirmed based on the results of the environmental and social due diligence, when more information is available.

The Project prepared an Environmental Impact Assessment (EIA) study for the wind farm and other EIA study for the transmission lines and auxiliary facilities. Both EIA studies have been approved by the corresponding environmental authorities.

Land acquisition and easement rights documentation, together with other authorizations and permits, will be reviewed during the environmental and social due diligence (ESDD).

The risks associated with the construction stage of the Project are mostly localized and can be managed with readily available best practices and mitigation measures. Examples of such impacts are potential social impacts caused by transportation of electro mechanicals components by truck from a port to the project site; potential soil and water contamination caused by inappropriate solid and liquid wastes management and pluvial erosion of soil caused by inadequate erosion management.

The main risks at the operation stage are those associated with noise, shadow flicker collision of birds and bats with blades of wind generators.

IIC has engaged the support of specialized consultants for the Environmental and Social Due Diligence (ESDD) to ensure the Project meets the requirements of the IIC Environmental and Social Sustainability Policy, consider possible cumulative impacts, confirm the project categorization, determine the need of further studies (such as additional bird and bat monitoring), evaluate consultation and disclosure efforts, assess management capacity and management systems to mitigate E&S risks and prepare an environmental and social action plan (ESAP) to address identified gaps. The ESAP will include E&S requirements for contractors, stakeholder engagement plans and management and supervision capacity from the owner.

An Environmental and Social Review Summary (ESRS) and the ESAP will be posted on the IIC's website once the due diligence process is concluded.

## ACCOUNTABILITY MECHANISM OF IIC

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).

For inquiries and comments to IIC, contact:  
IIC's Communications Group  
E-mail: [divulgacionpublica@iadb.org](mailto:divulgacionpublica@iadb.org)

For project inquiries, including environmental and social questions related to an IIC investment, please contact the client or the IIC using the contact information provided above. In addition, project affected communities have access to the IIC Independent Consultation and Investigation Mechanism.

Tel: +1 (202) 623-3952  
Fax: +1 (202) 312-4057  
Address: 1300 New York Ave. NW Washington, DC. USA. 20577  
E-mail: [mecanismo@iadb.org](mailto:mecanismo@iadb.org) or [MICI@iadb.org](mailto:MICI@iadb.org)
