## Project Description

CASEIF IV LP (Central America Fund) (the "Fund" or "CASEIF IV") is a new regional private equity fund that will provide growth capital and structured financing (mezzanine debt) to mid-sized companies with high growth potential in Central America, the Dominican Republic, and Colombia. CASEIF IV will be managed by LAFISE Investment Management Ltd. ("LIM"). Founded in 2000, with the support of IDB Lab (formerly MIF) and Norfund, LIM is the longest-standing Central American venture capital and impact investment fund manager dedicated to supporting the growth of Small and Medium-sized Enterprises ("SMEs") in Central America. CASEIF IV is expected to play an important counter-cyclical role in the midst of the severe Covid-19 crisis and the recent hurricanes that impacted Central America, with a target size of US\$75 million and US\$400,000 for technical assistance funds. It is expected to become the largest private equity fund ever created that focuses primarily on Central America and the Dominican Republic (at least 85% of the fund), with the objective of supporting the growth of medium-sized enterprises. The Fund's investment philosophy focuses primarily on aiding the development of the regional private sector by supporting entrepreneurs with strong regional expansion plans, acquiring new technologies to increase productivity and/or penetrate new market segments, and capitalizing on nearshoring opportunities. The Fund will invest in approximately 12 medium-sized companies with high growth potential in all economic sectors (multi-sector fund), particularly focusing on those where LIM has built special capabilities and networks for value creation, such as agribusiness, food and beverage manufacturing and processing, education, and information technology ("IT").
