## Project Description

According to the IDB Invest, the project consists in the design, development, construction, operation and maintenance of (i) two combined cycle power plants with net installed capacity of 430 megawatt (MW) each, totaling 860 MW (contracted capacity of 800 MW), (ii) electricity transmission infrastructure to allow the power plants to inject power into the national grid, (iii) a jetty and related infrastructure to allow the power plants to receive natural gas from a floating storage and regasification unit, all located near the Manzanillo port in the Dominican Republic.

The Project has been pre-classified as Category A, by IDB Invest's Environmental and Social Sustainability Policy, due to the scale of anticipated air and process water emissions that will extend beyond the boundaries of the Project site.

#### ACCOUNTABILITY MECHANISM OF IDB / IDB INVEST

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IDB Invest)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IDB Invest is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
