Camposol: Sustainable Agro-industrial Investments in Peru

Project Description

According to the IADB, the proposed transaction with Camposol S.A. ("Camposol" or the "Company"), a leading firm in the global fresh fruit market and the main exporter of blueberries from Peru, consists of an A/B loan of up to US\$140 million, with a term of up to 5 years and including a 2.5-year grace period. The funds will partially support Camposol's investment plan in its farms located in Trujillo, Peru, which includes: (i) investments primarily aimed at varietal renewal of blueberries using the Company's proprietary genetics, along with complementary investments in avocados, and (ii) permanent working capital associated with blueberry and avocado operations. The Project will contribute to: (i) increasing Peru's agricultural exports through Camposol, (ii) improving the productivity of blueberries and avocados through genetic improvement and varietal renewal programs, and (iii) generating employment and greater purchases from local suppliers.
