Project Description

According to bank provided information, the project consists of a subordinated Murabaha financing to Abu Dhabi Islamic Bank Egypt (“ADIBE” or the “Bank”). This Tier 2 capital instrument is intended to add diversity to the Bank’s capital base and long-term growth prospects.

ADIBE is an Egypt based Islamic bank that started its operations after the acquisition of the National Bank for Development (NBD) in 2007 by a consortium between Abu Dhabi Islamic Bank and Emirates International Investment Company. ADIB offers a broad range of banking solutions that cater to the needs of corporate and retail customers through a network of 70 branches and a team of over 2000 employees and experts. In order to integrate further services, the Bank established an Investment Banking arm, ADIB Capital Egypt; a leasing company, ADIFinance; and an asset management arm, ADIB Invest.

The project is a Tier II subordinated financing to ADIBE to increase the capital at the bank level, with relatively high exposure to corporate financing and substantial exposure to business activities with potential adverse environmental and social risks, including oil and gas, petroleum and petrochemicals, pharmaceuticals, construction, real estate development, and building materials and metallurgical industries.

Early Warning System Project Analysis

The IFC categorized the project risk as FI-1.

Investment Description

- International Finance Corporation (IFC)

The project involves a subordinated loan of up to US\$50 million to ADIBE for IFC's own account.

Financial Intermediary

Financial Intermediary: A commercial bank or financial institution that receives funds from a development bank. A financial intermediary then lends these funds to their clients (private actors) in the form of loans, bonds, guarantees and equity shares. Financial intermediaries include insurance, pension and equity funds. The direct financial relationship is between the development bank and the financial intermediary.
