Project Description

This project provides funds to Ashmore Andean Fund II, LP, a private equity fund. Ashmore will use the investment to finance loans and other investments to middle-market, infrastructure-related businesses. The businesses will be primarily in Colombia.

People Affected By This Project

(i) Emerging market private equity industry development: Private equity remains an important source of capital and expertise, particularly for small- and mid-market businesses and projects that IFC cannot invest in directly. IFC continues to play an important role in catalyzing PE industries in its target markets by supporting early entrants into the space and by continuing to back those with sustainable and proven models. (ii) Economic development and job creation: The Fund will provide equity capital to help develop and grow businesses and projects in the region, which will help promote economic growth, regional and global competitiveness, sustainability, and job creation. (iii) Strengthening businesses: The Fund will strengthen businesses from a financial, operational, management, and ESG perspective, thereby helping to make local projects attractive to foreign investors/acquirers, and encouraging further private investment in the region.
