Project Description

The proposed project consists of a 5-year loan for up to US\$50 million to be provided by IFC to Tanner Servicios Financieros SA (Tanner) and a 3-year loan for up to US\$50 million to be mobilized from other lenders under IFC's B lender program to support its lending activities to small and medium enterprises (SMEs) in Chile.

IFC's long-term financing aims to bring high development impact by enhancing Tanner's capacity to support access to finance for SMEs, resulting in higher growth, employment generation and poverty reduction. Furthermore, the project would also generate a demonstration effect by signaling other private investors about the potential presented by both the factoring and the SME sector in Chile.

The project will support the company's SME lending, enhancing access to short-term and long-term credit (leasing). Potential E&S risks and impacts associated with the project are likely to be of a medium to low nature, therefore it has been categorized as FI-2 according to the IFC's Sustainability Framework. Tanner's portfolio for SME's and other corporate entities is mostly concentrated in the financial sector (32%) with exposure to agriculture, manufacturing and services representing, respectively, 16%, 11% and 11%. Assets are mostly composed of short tenor transactions with 45% of credits maturing under 180 days and majority of remaining assets not exceeding 3 years tenor.

Investment Description

- International Finance Corporation (IFC)

The proposed project involves a US\$50 million loan to Tanner Servicios Financieros, a Chilean company focused on SME financing, leasing and factoring operations.
