Project Description

The proposed project consists of an up to EUR50 million senior loan to Alpha Bank Romania S.A. (“ABR” or the “Bank”), in order to support on-lending to residential mortgage borrowers in Romania.

The Bank was established in 1993 and now is the eighth largest bank in the country, with total assets of EUR3.3 billion and equity of EUR319 million as of the end of December 2015. ABR is a universal bank, with a market share of 4% by total assets and 8% for mortgage loans. It currently employs approximately 1,900 staff and has a national network of 130 branches in Romania.

People Affected By This Project

1. Contribution to economic growth through improved access to finance by individuals to buy or improve homes: Expanded financial intermediation is needed to support the flow of credit to individuals.
2. Create more job opportunities: By providing mortgage loans supported by IFC funding, the Bank will contribute to the development of the housing sector, which in turn creates jobs in the construction and other supporting industries.
3. Increasing financial inclusion in Romania: Access to credit and increasing the economic power of sub-borrowers would translate into improved livelihoods for a wide cross-section of society.
4. Sustaining the banking system: IFC is helping improve the sustainability of Alpha Bank in Romania, which would become less reliant on the Greek parent bank.
