The goals of the loan are to increase banking penetration and access to credit to underserved SMEs and individuals; increase employment; lower greenhouse emissions and encourage efficient management and re-use of scarce resources; and demonstration effect with other banks replicating this type of funding. The investment aims to support Banco Davivienda's effort in diversifying its funding sources, deepening its participation in the SME segment, as well as expanding the Bank's low and middle income mortgage activity.

The proposed investment is intended to be used for SMEs and housing. Davivienda focuses its operations in three segments: retail (15%), housing (26%), and commercial loans (59%) which includes both SMEs and corporate loans. SME lending under the asset class supported accounts for approximately 3% of the total portfolio. The overall portfolio risks includes a limited number of business activities that have potential limited adverse environmental or social risks or impacts that are few in number, generally site specific, largely reversible, and readily addressed through mitigation measures. The project has been categorized as FI-2 in accordance with IFC's Sustainability Policy. For this project Davivienda will be required to screen the loans against the IFC Exclusion List and the Costa Rican environmental and social laws and regulations.
