Project Description

The project (the “Project”) involves supporting Yapi Kredi Bank A.S. (“YKB”, or the “Bank”), through the purchase of an IFC-only issuance of covered bond of up to US\$150 million. The underlying asset pool will be backed by YKB’s existing mortgage portfolio. The proceeds of IFC’s investment would provide YKB long term financing to support the mortgage segment of its lending operations, with some portion to be allocated to ‘green’ mortgages per IFC’s eligibility criteria.

Established in 1944, YKB is the 4th largest private bank in Turkey; operating in retail (individual and SME), private and corporate / commercial banking. As of end-2016, YKB operates all around Turkey through its 936 branches and 19,400+ employees. In addition to universal banking services, Yapi Kredi Group also operates in leasing, factoring and asset management businesses. Yapi Kredi Group also has banking subsidiaries in the Netherlands, Russia, Azerbaijan and Malta.

As of end-2016, YKB posted Total Assets of TRY271 billion, Net Loans of TRY176.5 billion and Net Income of TRY2,932 million on a consolidated basis.

YKB is an existing IFC client.

Financial Intermediary

Financial Intermediary: A commercial bank or financial institution that receives funds from a development bank. A financial intermediary then lends these funds to their clients (private actors) in the form of loans, bonds, guarantees and equity shares. Financial intermediaries include insurance, pension and equity funds. The direct financial relationship is between the development bank and the financial intermediary.

- [YAPI VE KREDI BANKASI ANONIM SIRKETI](#) (Financial Intermediary) **is owned by** [Yapi Kredi Bankasi](#) (Parent Company)

Private Actor Relationship

There is often limited information publicly available about what development banks are funding through financial intermediaries. In 2021, the Early Warning System partnered with Oxfam International to incorporate information on high-risk projects being funded by financial intermediaries receiving funding from the International Finance Corporation (IFC) and the Dutch Development Bank (FMO).

The information listed below describes the relationship between the different private actors linked to high-risk sectors and subprojects of IFC and FMO's financial intermediary investments and/or the financial intermediary's parent companies made from 2017 through 2020, including any associated ring fences.

The database, however, does not explicitly or implicitly imply that IFC or FMO have material exposure to or are contractually or legally accountable to the sub-projects financed by their financial intermediaries or the financial intermediary's parent companies. It only shows a seemingly financial relationship among the different private actors, the financial intermediaries, and IFC or FMO.
