Project Description

From the IFC:

The proposed project consists of credit facility through a financing structure with Fideicomiso Hipotecario. With this financing, FHipo will continue to provide liquidity to mortgage loan originators in Mexico, allowing them to expand the amount of mortgages granted and thus benefiting a greater number of Mexican families.

FHipo is managed by Concentradora Hipotecaria S.A.P.I. de C.V.

IFC's support will enable FHipo to expand the scale of its investments, by increasing the amount of residential mortgage portfolios acquired by them. This in turn is expected to have a twofold impact:

i) Residential mortgages originators will be benefited by obtaining access to liquidity and funding diversification to increase their operations, and, consequently, increasing the number of families being able to get mortgage financing; and ii) Institutional investors will also benefit from the proposed Project, since it will contribute to a wider availability of impact investment opportunities in form of RMBS in the capital markets.

Investment Description

- International Finance Corporation (IFC)
