Project Description

According to bank documents, the proposed project consists of a multi-currency facility of an aggregate amount of US\$21.1 million equivalent to six African affiliates of the Baobab Group, one of the leading global microfinance networks with operations in nine African countries and China. The program includes support to the following subsidiaries, for on-lending to micro, small and medium enterprises (MSMEs): Senegal, Cote d'Ivoire, Madagascar, Nigeria, Burkina Faso and Democratic Republic of Congo.

People Affected By This Project

The most significant, expected Project-level outcome is increased access to finance including at longer terms by underserved MSMEs including Women owned MSMEs (WMSMEs). Beyond the Project, IFC anticipates that the Project has the potential to promote greater market inclusiveness via demonstration and replication channels.

Development Impact is expected to be measured based on the following factors:

- Stakeholders effects: change in accessibility - in the context of bridging finance gap for MSMEs (incl. WMSMEs and agri-MSMEs located in rural areas) in six countries by deploying (i) its products and services and (ii) access to scarce medium- to long-term finance.
- Stakeholder effects: change in affordability of finance for MSMEs - by (i) deploying digital channels, agent network along with multiple products offering to lower the access to finance cost for MSMEs.
- Inclusiveness: by demonstrating to other Financial Institutions the viability of product offerings and digital channels that meet the funding needs of WMSMEs and MSMEs in remote locations.
