## Project Description

According to IFC website, Abraaj Credit Managers Limited is seeking to raise up to US\$500 million for the Abraaj Global Credit Fund to provide growth capital in the form of direct lending to mid-sized companies principally across consumer-driven sectors in Africa, Asia, Latin America, the Middle East and Turkey. The expected development impacts of the project are:

1. Access to finance: AGCF will support access to finance to high-growth mid-market companies that have traditionally suffered from limited long-term debt capital, necessary to sustain their growth. The Fund will provide capital solutions via growth credit and mezzanine debt financing, as an attractive and viable alternative to equity.
2. Private sector development: Abraaj's active engagement in portfolio companies will help investees improve operational efficiency and achieve growth when they lack access to finance.
3. Job creation and economic growth: The proposed investment will contribute to the World Bank Group's goals of poverty alleviation by promoting job creation. The Fund will provide an important source of financing for high-growth mid-cap companies that are expected to create new employment opportunities and historically have the largest impact on job creation.
