Project Description

AC Energy, Inc. (“ACE” or the “Company”) is a wholly-owned subsidiary of Ayala Corporation (“Ayala”) in the Philippines that engages in power generation. Since 2011, ACE has invested around US\$1 billion in the power sector in the Philippines, Indonesia and, more recently, in Vietnam and Australia. It currently co-owns ~4GW (~1.8GW pro-rata share) of generation capacity in operation or under construction, including thermal, wind and solar assets in the Philippines, wind and geothermal assets in Indonesia, as well as solar assets in Vietnam.

ACE will guarantee the Green Bond. The proceeds of the Green Bond will be used as ACE’s equity and development capital for its renewable energy (“RE”) projects in the Philippines, Indonesia, Vietnam, Australia, and in other countries where ACE may operate. IFC’s subscription to the Green Bond would be dedicated to RE projects in Vietnam only.

Some of the sub-projects preliminarily identified for potential use of IFC proceeds include the five projects listed below, which are being developed with local partners viz. [BIM Energy](#) and [The Blue Circle](#) (TBC):
