## Project Description

The project involves the establishment of a minimum US\$750 million climate risk focused emerging markets fund, the HSBC Real Economy Green Investment Opportunity GEM Bond Fund (the “Fund”), managed by HSBC Global Asset Management (“HSBC GAM”). The Fund will help channel resources primarily from developed markets to finance climate related projects in developing countries. The Fund will achieve this goal by mobilizing capital from institutional investors, mostly, in developed countries and investing the capital in green bonds and to a lesser extent sustainability bonds issued by financial and real sector entities in developing countries. The issuing entities will in turn invest the proceeds of the bonds in eligible climate and social impact projects under a suitable framework
