<b>Sectors</b>	Climate and Environment, Energy, Infrastructure
<b>Investment Type(s)</b>	Loan
<b>Investment Amount (USD)</b>	\$ 140.00 million

## Project Description

Celsia Colombia S.A E.S.P. (“Celsia” or “the Company” - <https://www.celsia.com/es/>), is a vertically integrated utility and one of the largest private-sector energy companies in Colombia with hydro, solar and thermal generation as well as transmission, distribution, and energy commercialization. The proposed investment entails an up to US\$140 million equivalent COP-linked, 5-year unsecured corporate revolving facility to IFC’s existing client, Celsia Colombia S.A E.S. P (formerly EPSA, “Celsia Colombia” or “the Company”). The proposed revolving facility could be used for: i) construction of renewable energy projects and/or acquisition of renewable energy assets; and (ii) financing of regulatory and maintenance capital expenditure on the transmission, distribution, and commercialization segments (the “project”). Under this revolving facility, any proposed investment opportunity will be presented to IFC together with the technical and environmental and social (E&S) due diligence conducted by experienced consultants. Accordingly, IFC will decide if: i) approve disbursement of the requested amount; ii) approve disbursement with the implementation of required actions determined by IFC; or iii) cannot provide funding for the proposed project under this facility; compliance with IFC Performance Standards being a key criterion in making this decision. As part of the candidate’s pipeline for this revolving facility, Celsia has several solar projects and two wind power projects under consideration. Celsia’s Solar projects are mostly located in 4 departments, in the North and South West of Colombia including Valle del Cauca, Tolima, Atlántico and Santander departments. The wind power projects in development, Camelia (270 MW) and Acacia 2 (91,2 MW) and its associated transmission lines, are in the department of La Guajira covering the municipalities of Maicao, Albania and Uribia. In February 2018, IFC financed Empresa de Energia del Pacifico S.A. ESP (EPSA)’s construction and commissioning of the first utility-scale, grid-connected solar power plants in Colombia with a combined installed capacity of 178,8 MWp at peak. Publicly disclosed ESRS for this past investment is available at: <https://disclosures.ifc.org/project-detail/ESRS/39800/dcm-epsa-green-bond>.

## Contact Information

### ACCESS TO INFORMATION

You can submit a request for information disclosure at: <https://disclosures.ifc.org/#/inquiries>

If you believe that your request for information from IFC has been unreasonably denied, or that this Policy has been interpreted incorrectly, you can submit a complaint at the link above to IFC's Access to Information Policy Advisor, who reports directly to IFC's Executive Vice President.

### ACCOUNTABILITY MECHANISM OF IFC/MIGA

The Compliance Advisor Ombudsman (CAO) is the independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an IFC or MIGA- financed project. If you submit a complaint to the CAO, they may assist you in resolving a dispute with the company and/or investigate to assess whether the IFC is following its own policies and procedures for preventing harm to people or the environment. If you want to submit a complaint electronically, you can email the CAO at [CAO@worldbankgroup.org](mailto:CAO@worldbankgroup.org) You can learn more about the CAO and how to file a complaint at <http://www.cao-ombudsman.org>
