The purpose of the proposed IFC trade line is to support VistaGui's trade program. GTFP's investment in the form of a trade line will confirm banks partial or full guarantees (and other trade instruments) covering payment risk on banks in emerging markets in Republic of Guinea for their trade related transactions.

People Affected By This Project

The project builds on GTFP's global platform, increasing access to trade finance to emerging markets. The Project will provide increased access to trade finance to the Bank's customers. On the market side, the project will further connect the Bank's cross-border connections, increasing the country's integration through both financial and real sector channels. It will help to link more traders to other countries and connect the country's financial markets more deeply.
