Project Description

According to the Bank's website, the project consists of a Working Capital Solutions ('WCS') facility to Zenith Bank Plc. of up to US\$250 million. The facility will have a maturity of up to 3 years and will complement the existing FIG COVID-19 Emergency Response WCS facility (Project# 43988) that was committed in June 2020 and rolled over in June 2021. The project will enable the Bank to provide working capital and trade finance facilities to enterprises in Nigeria, including MSMEs impacted by COVID-19.

The financial intermediary's finance report indicates loans to unspecified oil and gas activities in 2022 and 2023.

Bank disclosures on financial intermediary sub-projects are often limited. Although the bank disclosures did not categorize this as an energy project, civil society research has linked this project with oil and gas. Therefore, for purposes of this snapshot and other research, the Early Warning System team has categorized this project as an "Energy" project.

Early Warning System Project Analysis

The IFC categorized the project risk as FI-2.
