The proposed investment is an equity investment of up to \$15M in Nazca Fund III, (“Fund III”), an Ontario-domiciled VC fund focused on investing in early-stage technology companies in Spanish Latin America (“LAC”), predominantly Mexico.

---

### People Affected By This Project

1. Increased access to early and expansion stage equity for technology companies in Mexico. Access to VC in Mexico remains low compared to the size of its economy. Within this context, Nazca will provide access to capital across an investee's lifecycle through its fund.
2. Increased competitiveness of Mexico's VC market. Mexico's VC ecosystem remains under-developed and the success of the Fund will prove the viability of this sector and help catalyze new local Fund Managers.
3. Increased competitiveness of key markets through the support of market-disrupting digital business models: VC funds such as Nazca invest in companies that often introduce a disruptive digital business model in a market. These innovative businesses can put pressure on incumbents to compete on prices and service quality. They can also strengthen supply chains by reducing the role of brokers and intermediaries, which improves price transparency and efficiency.
