Project Description

As stated by the IFC, the proposed investment consists of a financing package of up to US\$42 million to Bacao SAS to finance the development of approximately 3,800 hectares of cacao plantations and post-harvesting facility in the Meta region of Colombia.

Bacao is an agroforestry cacao company that seeks to produce sustainable cacao by creating inclusive and climate-smart productive ecosystems that will not only contribute to rehabilitate degraded lands but also benefit local communities.

The cacao will be supplied to Mars through a long-term off-take agreement. As of October 2022, 1,300 ha of cacao have been planted (150 ha are already productive), and additional 750 hectares are planted with shade trees, ready to be planted with cocoa seedlings. A small percentage of cocoa beans from local suppliers (less than 5%) are currently processed in the post-harvesting facility. These smallholder farmers also receive technical assistance from the Project. The Project employs about 360 workers and is expected to create 700 direct jobs. The closest towns are Cabuyaro (population 5,000), Barranca de Upia (pop. 5,000) and Villanueva (pop. 30,000).
