## Project Description

According to the Bank's website, IFC is considering an equity investment of US\$25 million and a US\$20 million co-investment envelope into Alta Semper Growth Fund II (AS II or the Fund). AS II is targeting a total fund size of US\$150 million to take majority stakes (or significant minorities with a path to control) in 6-10 mid-cap companies with an average deal size of \$15-25 million, targeting growth investments in resilient and high growth sectors of healthcare (including vocational education and post-secondary education for the healthcare industry) and consumer goods /services.

---

## Early Warning System Project Analysis

The Fund is expected to invest in defensive, high-growth companies in the healthcare, consumer goods/services, and education sectors. The E&S risks associated with the Fund's investment activities are considered medium and are expected to have potential limited adverse environmental and/or social risks or impacts that are few in number, generally site specific, largely reversible, and can be readily addressed through mitigation measures. As such, the Project has been categorized as FI-2 according to IFC's Sustainability Policy. The main E&S risks and impacts of the Project derive from the E&S risks associated with the Fund's investment activities and its E&S capacity and system in place to manage these risks. These risks typically include occupational health and safety, waste and hazardous waste management, and labor and working conditions, among others.

The Project will not support investment activities on the IFC Exclusion List, coal-related activities, for-profit K-12 private schools, or higher-risk business activities that may include a) involuntary resettlement, b) risk of adverse impacts on indigenous peoples, c) significant risks to or impacts on the environment, community health and safety, biodiversity, cultural heritage or d) significant occupational health and safety risks.
