## Project Description

As stated by the IFC, the proposed Project of equity injection will enable CHO, while strengthening its balance sheet and reducing its costs, to continue implementing its strategic plan aiming to enhance its global market position and ensure and diversify sourcing of raw material beyond Tunisia.

Under this new investment, the Company aims to strengthen its global market position. Thus, CHO (i) has established a subsidiary in Morocco and is currently looking for local partnerships to strengthen its position in the market; (ii) will add c. 1,000ha to its plantations located in Tunisia, (iii) has the objective to reach 30kT of bottled olive oil by 2026, (iv) intends to open new exports markets (UK and Africa), and (v) rebalance its balance sheet.

The Project will be supported by IFC's Advisory Services on three fronts already discussed with the Company: 1) Value Chain Farmers advisory (smallholders and mills to improve yields and quality), 2) Gender Edge Certification and 3) a Corporate Governance (CG) to help the Company strengthen its CG and raise its profile in view of a qualified IPO in the medium term.
