## Early Warning System Project Analysis

The Fund is targeting investments in companies active in Morocco and Tunisia as well as companies operating in Francophone Africa. The Fund targets investing in about 20 companies including Pre-Series A and Series A. The fund target sectors include: DeepTech, B2B & B2C, HealthTech, Fintech, EdTech, Agritech and Cybersecurity which are expected to have potential limited adverse environmental and/or social risks or impacts that are few in number, generally site specific, largely reversible, and can be readily addressed through mitigation measures. Therefore, the proposed project has been classified as a Category FI-2 project according to IFC Sustainability Policy. The key risks and impacts of the project derive from the Fund's capacity to identify and manage potential E&S risks associated with its investment activities. These risks are typically associated with labor and working conditions, occupational health and safety, amongst others.
