## Project Description

According to the Bank's website, this project is proposed under IFC's Global Trade Supplier Finance program ("GTSF" or the "Program") approved by the IFC Board on September 21, 2010 (Project #28723). On December 15, 2022, IFC Board approved increase of the Global Trade Supplier Finance Program (GTSF) limit from US\$500 million to US\$1 billion (Project #44970). Under GTSF, IFC provides short-term financing to suppliers ("Suppliers") in emerging markets selling to companies ("Buyers") on open account terms. Under this project, IFC will establish a supply chain finance facility line, that will utilize sustainability-linked pricing, for emerging market-based device and network equipment suppliers of Vodafone Procurement Company S.A.R.L ("VPC" or "the Company"). IFC's funding would focus on encouraging suppliers to adopt higher sustainable practices and drive device affordability in Vodafone's emerging market presence in the Africa and Central Eastern European region. VPC leads purchasing and supplier management for Vodafone Group Plc ("Vodafone") as a whole. Based in Luxembourg, VPC manages most of Vodafone's spending with suppliers worldwide.

## Early Warning System Project Analysis

This is a Category B project according to IFC's Policy on Environmental and Social Sustainability (2012) because the proposed project is expected to have limited adverse E&S impacts that are few, site specific, largely reversible, and readily addressed through existing mitigation measures. Key E&S aspects relate to telecom equipment supply chain, mainly handheld devices. Key issues are linked to labor practices including forced labor, occupational health and safety (OHS), wages, overtime, grievance mechanism, and overall safe and fair employment conditions.
