Project Description

According to the IFC, the proposed financing consists of a senior secured Kyrgyz Som (KGS)-denominated loan of up to US\$20 million equivalent to Adal Azyk LLC (AA or the Company), the largest sausage producer and integrated poultry farm in the Kyrgyz Republic, an IDA country, with about 55% market share in the fast-growing Kyrgyz sausage market, and a highly competitive position in the country's poultry market.

The IFC Loan will help fund the US\$33 million investment program aimed at expansion of poultry operations in 2024-2026, including construction of 24 broiler sheds, and a new feed mill (the Project). The Project will be implemented by Agro Kush LLC (AK), a subsidiary of AA. The Project is expected to be supported by the IDA PSW Local Currency Facility (IDA PSW LCF) as described in the Blended Finance Section.

AK's operations are vertically integrated and include a feed mill, a hatchery, forty-eight (48) broiler sheds, a slaughterhouse, rendering and wastewater treatment plants, and waste storage facilities. These facilities were commissioned in 2021 and are located in the northwestern part of Issyk Kul Lake near the Balykchy town and Sarikamish village. All broiler sheds are located in rural areas with a biosecurity buffer zone perimeter of at least two km with the neighboring villages. The broiler sheds and feed mill in Kemin are approximately 700 meters away from the nearest settlement, which is in line with national regulations. The raw material to feed the birds is purchased from suppliers in KR (wheat and corn) and Russia (soybean meal).
