## Investment Description

- International Finance Corporation (IFC)

The Project is an up to US\$200 million senior unsecured loan for IFC's own account with a 7-year tenor. It will support the expansion of the Bank's EDGE-certified (or equivalent green certification acceptable to IFC) green building finance and home loan portfolios in South Africa.

IFC, as implementing entity of the MAGC Program, expects to provide up to US\$3.8 million in the form of a performance-based incentive (PBI). The PBI will help accelerate the implementation of the Bank's green building strategy and catalyze the supply and demand of certified green buildings in South Africa. The PBI will be passed on to developers and buyers of certified green properties to partially offset the incremental greening and certification costs after such costs have been incurred. The level of concessionality (i.e., "subsidy") provided by the PBI is estimated to be approximately 1.9% of the total Project size of up to US\$200 million. As is the case with all IFC blended concessional finance co-investments, this Project has been assessed against the Enhanced Blended Concessional Finance Principles for Development Finance Institution (DFI) Private Sector Operations adopted by IFC and more than 20 other DFIs in 2017. Further information on these Enhanced Principles, IFC's blended finance approach and governance, and historical information on estimated subsidy levels in IFC's blended finance portfolio can be found at: [www.ifc.org/blendedfinance](http://www.ifc.org/blendedfinance)
