To pursue this goal, the project targets to achieve the following objectives by project completion:

(1) Business Registration and Licensing:

- Establishing further streamlined processes for increased efficiency and sustainability in the one-stop-shop created at the MoCI during Phase I of the project.
- Successfully rolling out the business registration and licensing reforms conducted in Kabul to MoCI offices at the provincial level in light of international best practices.

(2) Renewal of Business Licensing:

- Increasing efficiency and sustainability for the renewal process of business licensing in the MoF.

People Affected By This Project

The Investment Climate regulatory reform intervention is aimed at streamlining business registration and licensing procedures, which has long been regarded as a major obstacle to starting a business in Afghanistan. The objective of this project is to support the Government of Afghanistan at the national and sub-national level in developing the registration and licensing system by creating a transparent and simplified regulatory framework and reduces the complexity of the process; hence, reduce private sector compliance cost.
